Local businessman & church verger

STEVE W.
Can help with anything agricultural

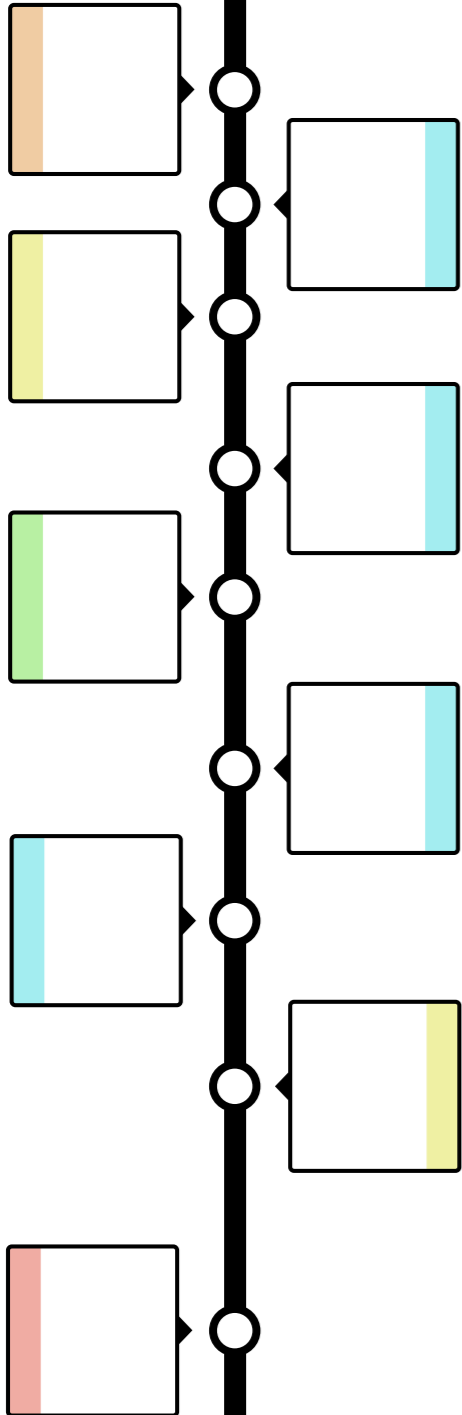

MARK R.
Odd jobs, especially painting, decorating

DONNA Q.
Part-time Postmaster, runs the shop

ROSEMARY T.
Current Parish Council clerk

TIMELINE

The basic representation of all the local data is as posts on a timeline. This can be reworked as required to fit best on any device...

...even ones with more basic screens, or without traditional displays altogether, or even with paper.

This might be small, instant paper printing such as receipt sizes (even back of the receipt printing in shops) or larger 'digest' forms such as hyperlocal news print.

Whatever medium it takes to make the overall system as inclusively as possible should be considered. Content and the interactions are constructed on 'cards'.

Front - the offer

Back - the actions

SIMPLE POST

Might be information, or a moment.
(eg. Photo, Shout out, Thought, Shared item)
User may read, bookmark, share to a person

INTERACTIVE INFORMATION

This allows a simple statement or question, and a simple response.
It could be used for very simple sales, or event announcements.
User has one-click responses or actions (eg. add to Cal, FB, Contacts)

NOTICE + TRANSACTION

The notice is an invitation to start a specific transaction (eg. Answer a question, Sale, Vote, Comment)
May require authentication.

FULL SERVICE

Where the card is an entrypoint to a larger service (eg. entire shop, service booking, making a recommendation). Usually requires authentication.

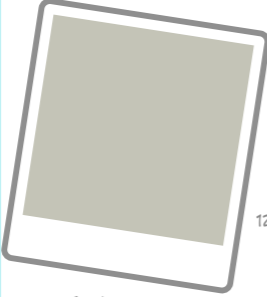

DEEP SOCIAL LAYER

Card is the visible point of a larger conversation or social space (eg. a new club or message forum users can join). Authenticated.

NOTE. It may not be necessary or desirable for the system as a whole to include this level, for common user-forum reasons - identity, anonymity, trolling, flaming, etc...!

SIMPLE POST

Lovely Day!

10.34AM
FRIDAY
12TH APRIL
